

1) Tell me about yourself.

A) My name is N. Kumar Reddy and I am from Pileru. I have completed my bachelor's degree from Sri Venkateswara college of engineering.

I am a Python beginner with strong interest in data analytics, and I enjoy learning new tools and techniques to derive insights from data.

2) Why did you choose a career in data analytics or data science?

A) I choose a career in data analytics because data helps solve real-world problems, and I want to use data-driven insights to support smarter decision-making.

3) What do you know about our company and why do you want to work here?

A) Your company values innovation and data-driven solutions, which inspires me to learn and contribute to meaningful analytics projects.

4) Describe a time when you faced a challenge in a project and how you handled it.

A) I struggled with cleaning a large dataset, so I researched new preprocessing techniques and applied them successfully, improving the final results.

5) How do you handle tight deadlines or pressure at work?

A) I handle pressure by staying calm, prioritizing tasks and managing time effectively.

6) How do you explain complex data insights to non-technical people?

- A) I Use simple language, clear visual, and relatable examples to ensure insights are easy to understand.
- 7) Describe a situation where your analysis or recommendation made a positive impact.
- A) My analysis improved the accuracy of a performance report, which helped in making better decisions.
- 8) How do you handle feedback or criticism?
- A) I take feedback positively as an opportunity to learn and improve my skills.
- 9) What are your short-term & Long-term career goals?
- A) Short-term:- I improve my python, sql, and analytics skills.
- Long-term:- Become a skilled data analytics working on impactful solutions.
- 10) What motivates you to do your best work?
- A) Continuous learning and seeing my work make a real impact motivates me to keep improving.
